

1.枚举

1.1 PTPrinterModule

2.属性

2.1 name

2.2 mac

2.3 module

2.4 uuid

2.5 rssi

2.6 strength

2.7 distance

2.8 peripheral

2.9 ip

2.10 port

2.11 sn

2.12 printWidth

2.13 dpi

1.枚举

1.1 PTPrinterModule

■ 代码

```
typedef NS_ENUM(NSInteger, PTPrinterModule) {  
    PTPrinterModuleBLE          = 0,    ///< ~chinese 蓝牙 ~english BLE  
    PTPrinterModuleWiFi        = 1,    ///< ~chinese 以太网 ~english  
    LAN/WiFi  
};
```

2.属性

2.1 name

■ 代码

```
@property(strong, nonatomic, readwrite) NSString *name;
```

- 说明

蓝牙名称

2.2 mac

- 代码

```
@property(strong, nonatomic, readwrite) NSString *mac;
```

- 说明

蓝牙物理地址

2.3 module

- 代码

```
@property(assign, nonatomic, readwrite) PTPrinterModule module;
```

- 说明

连接方式

2.4 uuid

- 代码

```
@property(strong, nonatomic, readwrite) NSString *uuid;
```

- 说明

蓝牙外设UUID

2.5 rssi

- 代码

```
@property(strong, nonatomic, readwrite) NSNumber *rssi;
```

- 说明

信号强度值

2.6 strength

- 代码

```
@property(strong, nonatomic, readwrite) NSNumber *strength;
```

- 说明

信号强度

2.7 distance

- 代码

```
@property(strong, nonatomic, readwrite) NSNumber *distance;
```

- 说明

距离

2.8 peripheral

- 代码

```
@property(strong, nonatomic, readwrite) CBPeripheral *peripheral;
```

- 说明

2.9 ip

- 代码

```
@property(strong, nonatomic, readwrite) NSString *ip;
```

- 说明

ip地址

2.10 port

- 代码

```
@property(strong, nonatomic, readwrite) NSString *port;
```

- 说明

端口

2.11 sn

- 代码

```
@property(strong, nonatomic, readwrite) NSString *sn;
```

- 说明

序列号

2.12 printWidth

- 代码

```
@property(strong, nonatomic, readwrite) NSString *printWidth;
```

- 说明

打印宽度

2.13 dpi

- 代码

```
@property(strong, nonatomic, readwrite) NSString *dpi;
```

- 说明

分辨率
